					2,5 mm

Sales arguments cutting discs

- Drawing cut
- HACCP-friendly
- No risk of oxidation and deformation in the dishwasher

Swiss quality machines for professional food processing

The company

Brunner-Anliker is the leading manufacturer of machines for cutting, chopping, grating, grinding and declumping foodstuffs. Our 80 staff manufacture high-quality products in our plant in Switzerland (Ticino), which are then sold around the world.

Drawing cut

The unique cutting geometry of our «drawing cut» prevents the unnecessary loss of nutrients and vitamins. Thanks to this biotechnological method and the hand-ground blades, the cell structure of even the most delicate fruits and vegetables is barely affected. This then leads to a significantly longer shelf life for the processed products.

Our quality promise

Brunner-Anliker appliances for professional applications work precisely and reliably while offering optimum user comfort. Thanks to their durability and reliability, they are often used for generations in many companies. Our machines comply with the most stringent safety aspects and are easy to operate and clean.

Quality Swiss products

Brunner-Anliker machines are a shining example of Swiss innovation, precision, durability and reliability. From development right through to production and sales, all processes are carried out in the Brunner-Anliker branches in Switzerland.
